

CLARINET, TRUMPET, HORN TUNING CHART

First start by playing your “tuning” note. Once the tuning note is in tune, check each note (possibly on your instrument) and place an x through the box where it registers on the grid below. This will give you a good idea where the tendency notes are on your instrument. Tuners are available on your phone including Tonal Energy Tuner. You can also pair off in partners and have one write while the other plays. Revised 8/24
